## PBS KIDS for Parents

**PBS Kids for Parents provides online learning activities for kids which helps with math, science, reading and more.**

### Instructions

- Logon to PBS Kids for Parents website: <https://www.pbs.org/parents/>
- Click on Learn & Grow at top of the screen (see below #1)
- Choose one of the learning modules math, science, etc. (see #2 below)
- Select your child's age (#3)

The screenshot shows the website's navigation and selection interface. It is divided into three numbered sections:

- #1:** A dark blue horizontal bar with four white text buttons: 'SHOWS', 'PLAY', 'THRIVE', and 'LEARN & GROW'. Each button has a small white downward-pointing arrow. A white arrow points to the 'LEARN & GROW' button.
- #2:** A dark blue horizontal bar with four circular icons. From left to right: 'LITERACY' (with 'A', 'B', 'C' letters), 'MATH' (with '+', '-', '÷', '×' symbols), 'SCIENCE' (with a flask icon), and 'ARTS' (with three colored markers). White arrows point to each of these four icons.
- #3:** A dark blue horizontal bar with the text 'My child is:' followed by seven colored squares containing the numbers 2 through 8. The squares are orange (2), teal (3), purple (4), yellow (5), pink (6), green (7), and light blue (8).

- Once a topic is chosen and an age selected, a screen will come up with multiple options for learning activities related to that topic. See below sample for Math for 6 year olds.

## Math for Six-Year-Olds

### 💡 **Play a Card Game**

With a deck of cards, you can teach your child a card game that uses comparison skills.

**More Numbers & Counting Tips** ▶

### 💡 **Count on Your Fingers**

This is a great age to introduce your child to using her fingers to figure out math problems.

**More Problem Solving Tips** ▶

Links with ideas for **crafts and activities** are also offered based on your child's age.

Find **helpful articles** with tips on how to talk to kids about sensitive topics such as racism.
